The Soul of Yoga

300 Hour Advanced Yoga Teacher Training

Thank you for giving us the opportunity to tell you about our 300 Hour Advanced Teacher Training Program! This training may be completed in person, online, and via recordings!

Here are just some of the qualifications that set Soul of Yoga training apart:

- **Our master level faculty.** While some other training programs might be taught by Chiropractors, Acupuncturists, PT's or other non-yogic healers, our faculty are true Yoga Experts, Masters and Researchers that have been living and studying yoga and its therapeutic effects for decades. Leslie Kaminoff, Nischala Joy Devi, Richard Miller, Amy Weintraub, Indu Arora and other renowned yoga luminaries will impart their depth of wisdom to you in this very special training program.
- **A deeply spiritual journey.** Yoga is a spiritual tradition. Soul of Yoga's training takes students deep into the heart and soul of the Yogic teachings, guiding you on a journey into your own spiritual being. To us Yoga Teacher Training is more than vocational, it's a pathway for personal transformation.
- **Choose your courses.** Our students have the chance to "specialize" their teaching career by choosing their courses. Whether you want to specialize in Hatha or Kundalini, Ayurveda, or working with addiction, illness recovery or the aging population you'll find the right coursework to suit your own personal yogic path.
- **Total freedom.** We make it easy by allowing you to take the curriculum in any order, providing distance learning options and by offering low cost, no credit check payment plans.
- **Repeat classes.** Soul of Yoga offers our students the opportunity to repeat in-house courses they've already taken at no additional cost. We know that Yoga study is a lifelong endeavor and we want to support you in having a deeper and richer understanding of what you've learned.
- **Continuing your education.** Many of the courses in the 300 Hour Advanced Training program are also part of our 800 Hour IAYT Accredited Yoga Therapy Training curriculum. Students that graduate from our 300 hour program have the opportunity to continue directly onto the Yoga Therapy Training program without a bridge program required.

What our graduates say about us...

“ The Soul of Yoga 300 hour Advanced Yoga Teacher Training changed my life. Studying with Master Teachers and understanding the richness of the various yoga traditions helped me better understand my students and myself. It gave me the skills and confidence to become a yoga studio owner, create a yoga school, and to teach anyone that walks into my class.” - Malissa

“ The Soul of Yoga’s 300 hour Advanced Yoga Training enriched my teaching abilities, and more importantly, my whole life. The master faculty is unsurpassed. Each training day brings the perfect balance of asana, lecture, and spiritual study all infused with the incredible love, devotion & energy that is the essence of The Soul of Yoga. I couldn't recommend a better Advanced Teacher Training!” - Glenda

“ When I signed up for the training, I had no idea that it was going to change everything in my life. On the personal level, the most important part is that I learned about LOVE like I didn't know existed! This changed everything else in my life, the way I see myself and others, the way I interact with everyone that crosses my path, and it showed me why I'm here right now, I found the purpose of this lifetime!” - Elena

“ This course provided me with knowledge & experience of the physical & subtle body far beyond my expectations, as well as the motivation & inspiration to continue growing and evolving into the best Yoga Teacher that I can be.” - Caitlin

“ The Soul of Yoga 300 Hour Advanced Training taught me how to be a true teacher and yogic healer. I now feel confident leading group classes, no matter who walks in or what pain or condition they are facing. Since graduating I have built a successful business seeing private clients who I am able to confidently guide through emotional issues, spiritual dilemmas and physical difficulties. Being able to choose my courses gave me exactly the training I needed to follow my dream of helping people facing challenges.” - Deanna

Advanced Teaching Skills

Hours	40
Faculty	Flossie Park, Leslie Kaminoff, Jivana Heyman, Monique Lonner
Delivery	In person and Zoom
Schedule	November 7-12, 2024 9:30am - 5:15pm PST

Learn to more skilfully adapt your teaching for students with differing therapeutic needs. Topics of this training course include prenatal and chair teaching modifications and methodologies, common injuries, misalignments, adaptations and effective sequencing.

Nov 7-8

Reconsidering Alignment with Leslie Kaminoff

Asana is one of the most powerful therapeutic tools to foster functional movement patterns and improve health. This workshop with *Yoga Anatomy* co-author, Leslie Kaminoff, will provide you with a contemplative perspective on alignment as a tool to accentuate the therapeutic benefits of asana for each individual.

Students will learn how common misalignments in the foot, knee, neck, shoulders and spine can be observed in asana, and corrected through anatomical alignment principles.

Nov 9 - 10

Adaptive Chair Yoga with Jivana Heyman

Skillfully utilizing a chair for yoga teaching can make the benefits of asana and meditation more accessible to anyone. Jivana Heyman, founder of The Accessible Yoga School, will teach you how to invite students to use a chair as an accessible prop in a group class, as well as how to create effective and inspiring group Chair Yoga classes.

Nov 11

Prenatal Yoga Training with Flossie Park

Yoga can give new life to anyone at any age, but it becomes especially helpful for mothers-to-be. Students will learn the methodology of prenatal and postnatal Yoga, various philosophies, such as natural birth and supporting birth choices, anatomy of the female pelvis,

benefits and contraindications, positive affirmations and visualizations for pregnancy and birthing.

Nov 12

Advanced Sequencing with Monique Lonner

A well thought out sequence is the key to integrating our newly acquired advanced skills and teaching an effective, healing and powerful yoga practice.

Learning the art of sequencing will allow you to organize your skills and understanding and create classes that elicit specific effects, like calming, energizing, relieving, strengthening or stretching. Students will develop skillful sequences designed to eliminate dysfunction and establish functional movement patterns and balance energy through effective practices that meet your intentions and your student's needs.

Topics will include the necessary ingredients for optimal sequencing including pose and counter pose, peak pose, optimal conditioning, breathing patterns, movement and holding, different types of stretch, rests and meeting the mood. This course will include lecture and dyad practice.

Brain on Yoga

Hours	40
Delivery	In person and Zoom
Faculty	Dr. Linda Chamberlain, Shannon Ramo, Shawnee Thornton Hardy, Sherry Zak Morris, Kyla Pierce
Schedule	TBA 2026 9:30am - 5:15pm PST

Learn how the miraculous brain develops during childhood, is affected by life's events and how to teach to a neurodiverse population. Yoga practices to support a healthy brain during all stages of life are explored, including the understanding of traumatic brain injury, autism and Alzheimers.

Brain Development for Young Yogis, with Dr. Linda Chamberlain

Understanding how the brain develops is an important foundation for teaching yoga to children and adolescents. Students will learn the profound impact of mind-body practices on healthy brain development during this time of major brain remodelling and windows of activity. Special focus will be placed on the exploration of the pathway of stress and fear through the brain and why, from a neurodevelopmental perspective, loving kindness and interoceptive skills should be incorporated into yoga with preschoolers and young children.

This workshop will highlight user-friendly content, micro-practices and tools that can be shared with caregivers and children. Participants will get to meet Dr. Linda's crew of puppets that are dedicated to empowering children by teaching them how their brains work. We will all get to explore our inner child through meditation, journaling, and small group discussion.

Children's Yoga, with Shannon Ramo

This experiential session invites your inner child to a fun and educational Kid's Yoga session. You'll see first hand how the practices and practicalities of kid's yoga support early brain development, foster healthy emotional processing and inspire imaginative movement and healthy community building skills.

Yoga, Autism & Neurodiversity, with Shawnee Thornton Hardy

Shawnee is dedicated to bringing the practices of yoga and mindfulness to children and adults of all brains, bodies and abilities. In this 3 day workshop you'll learn how these ancient and powerful practices can be shared in ways that are both inclusive and accessible to those with diverse needs and backgrounds including; neurodiversity, disability, sensory processing

challenges, communication challenges, motor impairments, anxiety, depression, trauma and more...

Integrating yoga and somatic movement in educational, therapeutic and home settings supports children, teens and adults in building greater capacity and resilience. The benefits include; improvement in self-awareness, self-regulation, self-esteem, social skills, body awareness, sensory processing, movement & coordination, fine/gross motor skills, attention, focus, learning and behavior.

Chair Yoga and Dance for Brain Longevity, with Sherry Zak Morris

This workshop synergizes the holistic healing work of the leaders in the senior wellness arena. Sherry Zak Morris has brought Chair Yoga and Chair Yoga Dance to millions of people through her popular YouTube channel and Yoga Vista Training platform. The Alzheimer's Research and Prevention Foundation has pioneered the brain longevity movement through decades of research and education.

With her renown passion and skill Sherry Zak Morris will teach you her innovative approach to Chair Yoga, emphasizing accessibility and joy, while integrating the latest insights from the Alzheimer's Research and Prevention Foundation on brain longevity. You'll learn evidence-based techniques that fuse yoga, dance, and cognitive well-being, offering therapeutic tools to support body and brain health in aging populations.

Yogic Healing for Traumatic Brain Injury, with Kayla Pearce

Traumatic brain injury (TBI)--which includes concussion--is common, complex, and leads to a range of physical, cognitive, and psychological challenges that are often not adequately supported by traditional western medicine. Because TBI is often invisible, survivors experience a lack of feeling seen, heard, and valued, which can amplify depression, strained relationships, and suicide and suicidal ideation. The good news is yoga and mindfulness have been shown to improve many dimensions of health and well-being after TBI. Yet, these practices are often inaccessible or unsafe for the unique needs of the TBI community. To address this gap, LoveYourBrain offers comprehensive trainings and programs in evidence-based yoga and mindfulness for resilience, community connection, and well-being after TBI. This one day workshop will cover the causes and consequences of TBI, gentle yoga modifications and effective sequencing, meditation and pranayama techniques to regulate the nervous system and improve attention skills, trauma-informed teaching techniques, language and cuing best practices for cognitive processing and memory, and more. There will be hands-on practice teaching in small groups, interactive Q&A, live yoga & meditation practices, and interactive breakouts to connect with peers..

Chronic Disease & Ease

Hours	40
Delivery	In person and Zoom
Faculty	Dr. Stephanie Sutherland, Jillian Pransky, Monique Lonner
Schedule	February 19-24, 2025 9:30am - 5:15pm PST

Chronic disease, chronic pain, and auto-immune diseases affect tens of millions of people and are not always well addressed by allopathic medicine. Here we will elucidate the holistic understanding of these conditions, and detail the most useful yoga therapy tools, including restorative yoga.

Anatomy of Aging with Monique Lonner

In this one day workshop Monique Lonner will discuss how some of the disease states that are considered akin to normal aging can be prevented and perhaps even reversed.

Through a holistic tour of the whole body system Monique Lonner will share an integrative approach to staying healthy and happy as we gain in years. From metabolic disease to heart disease to bone density, nerve health and hormonal balance, you'll come to understand specific yoga practices can keep you younger deep in your cells and through your entire anatomical and physiological framework.

Chronic Disease & Pain with Dr. Stephani Sutherland

Millions of people suffer from conditions of chronic pain, autoimmune disorders and other chronic diseases. These conditions can be life draining and debilitating for those living with them. Adding to the challenge is that these conditions are often misunderstood or not well addressed by our Western Medical model.

Dr. Stephani Sutherland, Neuroscientist, is one of the world's leading experts on pain as well as a highly respected researcher and author on a number of other chronic conditions including neurological disease and long covid. She is also a Yoga teacher. In this two day workshop you'll learn the science behind these complex whole-brain experiences, as you gain an understanding of the integrative interventions that have been shown to provide relief and support, such as Yoga and meditation.

Ease for Chronic Disease, with Jillian Pransky

With Restorative Yoga expert Jillian Pransky you'll learn the science of the relaxation response theory and why it's so useful for people with chronic conditions. Study the anatomy of the psoas and nervous system and the neurological, physical, psychological, and energetic principles of working with Restorative Yoga.

Schedule	May 21-26, 2025 9am-4pm PST

In this module, we will explore and practice sacred breath and chanting techniques; examine consciousness; and study the body's cosmology: mind, body, subtle body, soul. We will explore how thoughts engage the mind, and take a dive deep into developing the meditative mind. We will also learn about the physical body and overview the subtle body: everything from anatomy and physiology of yoga to an introduction to the chakras and their functions. This module will include a deeply informative anatomy and physiology workshop with our own E-RYT 500, IAYT certified Monique Lonner, a workshop which goes beyond the physical to explore the manifestation of the energetic body within the physical body.

Foundations of Yoga Meditation

Hours	40
Delivery	Zoom Only for 300hr
Faculty	Dr. Richard Miller and Ford Peck
Schedule	May 18-23, 2025 Times TBA

Meditation has been scientifically proven to reduce anxiety, lessen pain levels, promote emotional resiliency, increase self awareness and control, reduce blood pressure, improve sleep and foster general well-being. It's also an essential vehicle for spiritual exploration and transformation.

While the Buddhist tradition is often credited with the much-studied therapeutic meditation technique of *Mindfulness*, it's true that the Yoga tradition also offers in-depth meditation principles and practices which confer mental, emotional and physical health benefits.

This 5-day meditation retreat led by Ford Peck and Richard C. Miller, developer of the iRest Meditation Program, focuses on the rich history and offerings of Yogic meditation techniques. During retreat Ford and Richard will guide you into the depths of self-exploration through practices and discussion of the Yogic meditation principles including self-inquiry, pranayama, hatha yoga, yoga nidra, and sitting and walking meditation practices.

The workshop will include a mix of practice, lecture and practicum.

Transcending the Kleshas, with Flossie Park

Nov 9, 9:30 - 12:45

The Kleshas, as described in the Yoga Sutras, are considered to be the main roots of human suffering. They include attachment, aversion, division, ignorance and fear. These Kleshas distort our minds, direct our reactions and affect how we engage with the world. They may even change the course of our lives and hinder us in our Dharma and personal growth. While no human is immune from loss, pain and difficulty in their life, viewed and understood through the lens of Yoga philosophy, we have options. In this workshop Flossie Park will explore the Kleshas through a modern lens with reflective and supportive practices, and will help uncover the belief systems we hold about life which limit our capacity to open to new possibilities of existence.

The Science of Grief, with Monique Minahan

Nov 9, 2-5:15pm

Monique Minahan is the author of *The Grief Practice*, a trauma-informed Yoga teacher and Somatic Experiencing™ Practitioner (SEP). She is also a fellow human who has faced her own depression and grief after losing her husband to a complication of chemotherapy. In this workshop Monique will explain the mental, emotional, physical and communal aspects of grief through a polyvagal-based, trauma-informed lens. Looking at grief and its accompanying emotions through the lens of neuroscience and movement science, we will begin to understand how trauma-informed movement and awareness practices can provide a container where the experience of grief can be related to with curiosity and compassion.

Feel it to Heal It, with John Vosler

Nov 10, 9:30-5:15pm

Depression, anxiety, trauma, and grief are mind/body experiences. Still, we humans so often prefer to suppress, push away, deny, react, cognitize, or just keep talking about it rather than feeling and experiencing it. We have feelings about our feelings without being present in our bodies and breath. Many people unconsciously shut off their embodied experience due to deep-seated fear and aversion. Choosing for or against what is present.

John Vosler will lead us through an uplifting experiential workshop providing compassionate guidance and the opportunity to experience the benefits of feeling it to healing it. You'll leave with a sense of personal empowerment and tools to empower your clients and students on their emotional healing journeys. All the while gaining personal insight into your healing.

Philosophy & Physiology

Hours	40
Delivery	In Person and Zoom
Faculty	Phil Goldberg, Leslie Kaminoff, Dennis Chowenhill, Lorin Roche, Phd
Schedule	April 21-26, 2025 9:30am - 5:15pm PST

Body, Mind, Spirit. Traditionally study revered texts of Yoga - the Bhagavad Gita, Upanishads and Jijnana Bhairava - and then personally experience the wisdom through your body with asana, breathwork, meditation, mantra and dance. An enlightening experience!

Living a Fulfilling Life, A Deep Dive into the Bhagavad Gita Study with Phil Goldberg

This practical workshop illuminates the core teachings of one of the most profound, sublime and influential works the human mind has ever produced. The Bhagavad Gita has been seen as a religious scripture, a spiritual guidebook, a self-help manual, a philosophical and psychological treatise, a science of consciousness, and more. It encapsulates the essence of Yoga at its deepest level, where its capacity for transforming human life is greatest. Using contemplative practices with the key passages, we will absorb the true meaning of Yoga; and, with a traditional meditation practice, we will experience the essence of the Gita's message: Established in Yoga, perform action.

See why Thoreau read it every morning on Walden Pond and why Gandhi called it his "spiritual dictionary" and turned to it whenever difficulties arose.

The workshop will emphasize the Gita's lessons for realizing the yogic ideal not just on a mat or a cushion, but in the midst of everyday life. The tools and insights you take away will accelerate your path to life of wholeness, unity and integration.

Philosophy & Physiology with Leslie Kaminoff

Leslie Kaminoff, co-author of best selling Yoga Anatomy will use his deep and vast knowledge (and unique image library) to illuminate the fascinating cross-fibers of Yoga Philosophy and human Physiology. From the basics of cellular metabolism to the development, architecture and functions of our miraculous human forms we embody some of the most foundational teachings of Yogic understanding. This course will include study of the interconnectedness of all our body systems and explain how yoga therapy works to create balance and healing at our physiological core.

The Radiance Sutras with Loren Roche

The gateways to wonder and delight are flung open wide for all to enter. At once a beautiful love song and an encyclopedia of of yogic techniques, the cherished text known as the Jijnana Bhairava Tantra shimmers with new effulgence in Lorin Roche's *The Radiance Sutras* workshop. Lorin brings his unique perspective on the Sanskrit teachings, along with his one-of-a-kind guidance in how to meditate with, embody, and practice them - what he describes as "answering the call of the sutras you love."

Restorative Yoga

Hours	25
Delivery	In Person and Zoom
Faculty	Chiara Stella
Schedule	June 2-4, 2025 9am-6pm PST

Restorative Teacher Training provides the teacher with a clear understanding of the role of the nervous system as well as the subtle energy body and how they relate to relaxation response. You will be guided to explore how restorative poses can be used to create balance, nurture inner quiet, and renew core energy.

Students will also learn skills to help you create deeply transformative poses through the use of voice, sound therapy, specific themes, verbal cueing, and props. Trainees will practice tuning in to the subtle energetic field of their students, developing the ability to sense, see, and feel physical and energetic misalignments and skills for adjusting them to create a greater sense of health and wholeness.

Secret Power of Yoga

Hours	20
Delivery	In Person and Zoom
Faculty	Nischala Joy Devi
Schedule	June 20-22, 2025 9:30am - 5:15pm PST

The Yoga Sutras is one of the most revered texts of yoga and is thought to be more than 2,500 years old. These "threads" on yoga or union, are extremely terse, stating concisely and often precisely, essential points or techniques to achieve self-realization. Originally these teachings were passed on in the ancient oral traditions, intimately shared from teacher to student. Even today almost every translation of the sutras includes pages and pages of master commentary deemed useful to impart the correct teachings, methods and sacred wisdom necessary to achieve Yoga.

In this workshop Nischala Joy Devi will impart her heart-centered intuitive interpretation of the Yoga Sutras from her book - *The Secret Power of Yoga*. Nischala Joy Devi's is a divinely feminine perspective of the Yoga Sutras which offers students an opportunity to partake in the unfathomable sense of peace, emotional and spiritual enlightenment that is our birthright.

Subtle Anatomy

Hours	25
Delivery	In Person and Zoom
Faculty	Nischala Joy Devi
Schedule	February 20-23, 2026 9:30am - 5:15pm PST

One of the most profound insights of Yoga is that we have, and are, more than our physical body. In fact we have 5 bodies, or layers, that cover our pure self, or the light within. These layers are called the Maya Koshas - literally *Maya* (illusion) and *Kosha* (body or sheath).

The wisdom of the Maya Koshas provide an illuminating lens through which to understand the integrated nature of mind, body and spirit and its implications for balance and wellbeing, health and disease.

The 5 Koshas include the layers of the physical body, our thoughts and emotions along with states of higher consciousness and bliss. We also embody an energetic and rarefied layer of our being that illuminates, vitalises and balances our body and mind. This is our “Energy Body”, referred to as the PranaMaya Kosha, and it is home to our subtle anatomy, which is the in-depth subject of this course.

We will explore subtle anatomy in order to understand how Prana flow can foster balance, well-being, health and spiritual awareness, while obstructions in the flow can create imbalance in body and mind and initiate disease states.

We will cover the Pancha Maya Model, the Nadis (energy channels in the body), The seven main Chakras and the why and how of Yoga Therapy practices that have profound effects on every layer of our systems.

With this new awareness we are able to use yogic practices to enhance, and balance our bodies, minds, and ultimately our lives.

Vinyasa Yoga Teacher Specialty Training

Hours	50
Delivery	In Person and Zoom
Faculty	Stacy McCarthy
Schedule	July 28-August 1, 2025 8:30am - 6pm PST

The 50-hour Vinyasa Yoga Training teaches a method that balances precise instruction, detailed alignment, breath and fluid movement. Classes are carefully themed to deepen the students' experience of yoga. A flow of sun salutations and postures are skillfully sequenced, and modifications and props are used to individualize the practice for each student. The program uniquely blends the eastern and western teachings of yoga with today's most current and practical applications. The training is anchored in a deep understanding of the body and biomechanics and goes far beyond teaching poses alone.

While the curriculum is stacked for an immersive learning experience, the delivery is interactive and personalized, encouraging a well-rounded approach to developing both your personal practice and your teaching skills. The training is specifically designed to help you:

- Advance your study of asana (including proper alignment, benefits, and contraindications of the physical postures)
- Understand the principles of anatomy and body mechanics
- Explore the science and art of sequencing
- Learn how to teach online and in person
- See and interpret how energy moves through the body
- Use props to improve or modify a posture
- Cultivate your voice, both as a teacher and as an individual
- Build confidence through practice teaching
- Learn and define the Sanskrit names of postures

Yin Yoga Foundations

Hours	25
Delivery	In Person and Zoom
Faculty	Joe Barnett
Schedule	March 9-11, 2025 8:30am-5:30pm PST

Yin Yoga is a simple practice of quiet and surrender, a practice of settling into a posture for 3-7 minutes, relaxing the body's resistance, allowing the deeper and stiffer tissues, the fascia that wrap muscles and form joint capsules, to be safely and therapeutically stretched, hydrated and strengthened. At the same time, the techniques naturally offer a deep rest for the body, and a refuge for the mind and heart.

Yin Yoga is a functional practice. Guiding students toward this simplicity and surrender can be challenging. It requires a general understanding and appreciation of the infinite complexity of human variation. Physically, mentally and emotionally, every Yogi is unique and requires a unique approach. Realizing this, founder of Yin Yoga, Paul Grilley, along with his senior students and assistants developed a system of Archetypes and Variations and various dialogue practices to help teachers help their students toward greater self-knowledge.

Posture Analysis: Anatomy and Function.

All Yin Foundations courses include a brief analysis of each of the 5 Yin Yoga Archetypes. In each of the Yin Foundations courses, we take a deeper study of one of the five. In this course, we will spend extra time on the Twisted Tree Module and its target areas: the spine, its discs, the sacrum, the outer hip, and the shoulder girdle.

Yin Yoga Foundations

Hours	25
Delivery	In Person and Zoom
Faculty	Joe Barnett
Schedule	March 13-15, 2025 8:30am-5:30pm PST

This is an advanced Yin Yoga training designed for the Yogi who has completed at least one Yin Foundation Module with Joe Barnett or an equivalent introductory training to the Grilley Model of Yin Yoga (14 Skeletal Segments, 10 Muscle Groups, 7 Archetypes).

In this Next Level course, we approach the practical topics of communicating effectively.

The Yin teacher's two voices: group leader and one-on-one consultant.

Through a hands-on, interactive group study of anatomy and movement, we appreciate the endless variety of humankind. Through explorations of the of the Variations of the Yin Archetypes, analyzing foundational sequences, and dialogue techniques with fellow students, we gain a set of practical tools to successfully lead a group or private class.

Yoga of Recovery

Hours	50
Delivery	In Person and Zoom
Faculty	Durga Leela
Schedule	July 14-19, 2026 9:30am - 5:15pm PST

Yoga of Recovery is the first comprehensive course to combine Ayurveda and Yoga with traditional recovery tools to offer a more holistic mind, body, spirit approach to addictions, eating disorders and self-destructive behaviors. Bringing the west (neuroscience and 12 Steps) and the East (Yoga and Ayurveda) together offers a truly empowering approach to counseling those who embark on a program of recovery. It is the evolution of the solution.

Upon completion of the course you will have the skills to introduce the healing potential of the holistic sciences of Ayurveda and Yoga to address addictive and self destructive behavior into your own life and those of your students and clients. As a Yoga Professional this course will make you uniquely qualified and more confident to teach yoga in rehabs or to people in recovery from any addiction. You will fully understand the root of the problem and the holistic approach, extended from limited understanding of substance abuse/behavioral problems to be treated with asana alone, to a full range of therapies for mind, body and spirit from powerful healing modalities.
